1. Scope of this Deliverable

The purpose of this report is to provide the support for documentation of the DEVOTES E-Newsletter. This was reported in the Description of Work (Deliverable 7.2 – D7-2) as part of dissemination activities undertaken in the context of WP7. The electronic newsletter has been used as a broad tool for multi-purpose timely communication and dissemination of all project outcomes.

Although the lead party of this Deliverable is NILU, the responsibility of these activities was transferred to Ecoreach during the Kick-off meeting of the project, when a reallocation of the duties on WP7 was discussed. Therefore, Ecoreach is the main author of this Deliverable and is leading the activities.

2. Newsletter issues

In total, 6 Newsletters and different Brief News were produced from May 2013 to October 2016. All Newsletter issues were published with Mailchimp (<http://mailchimp.com>), which allows archiving the past issues of the newsletters, to save new subscriptions and to get statistics on the readers. Most of the issues were transformed in pdf and published in "issuu" (<https://issuu.com>), a platform that includes publications from publishers all over the world.

The Newsletters and the Brief News were sent via email to the registered Stakeholders of DEVOTES, to the Advisory Board members and to all DEVOTES participants.
